What this standard covers

This standard specifies the terms and definitions, types and basic parameters, models, technical requirements, test methods, inspection rules, factory data, marking, packaging, transportation and storage of spiral coil type coke oven riser raw gas sensible heat recovery heat exchangers. This standard applies to spiral coil type coke oven riser raw gas sensible heat recovery heat exchangers with water as the heat medium, steam design pressure not exceeding 6.4MPa and temperature not exceeding 450°C. Other heat medium coke oven riser raw gas sensible heat recovery heat exchangers can be used as a reference.

Document data

International classification (ICS): 77.180.

Chinese classification (CCS): H95.

Estimated length of the Chinese original: 15,179 words.
