What this standard covers

This standard specifies the basic principles, evaluation indicators and evaluation methods for the evaluation of green factories in the silicon-based ferroalloy industry. This document applies to ordinary ferrosilicon production enterprises. This document evaluates silicon-based ferroalloy production enterprises that produce special ferrosilicon and ferrosilicon composite alloys such as low-aluminum ferrosilicon and high-purity ferrosilicon by refining or special methods after conversion according to the main energy consumption indicators.

Document data

International classification (ICS): 77.100.

Chinese classification (CCS): H42.

Estimated length of the Chinese original: 22,271 words.
