What this standard covers

This standard specifies the energy consumption level, technical requirements, statistical scope and calculation methods, and energy-saving measures for light-burned magnesium oxide per unit product. This document applies to the calculation and assessment of unit product energy consumption of enterprises producing light-burned magnesium oxide using magnesite as raw material, as well as the energy consumption access of new construction, renovation and expansion projects.

Document data

International classification (ICS): 77.010.

Chinese classification (CCS): H04.

Estimated length of the Chinese original: 6,610 words.
