What this standard covers

This standard specifies the process flow, technical requirements, environmental protection, evaluation and acceptance, operation and maintenance of the rotary kiln-submersible furnace smelting nickel iron process specification. This document is applicable to the construction and reconstruction of nickel-iron smelting equipment and process improvement. Other ferroalloy smelting energy-saving process systems can be used as a reference.

Document data

International classification (ICS): 77.010.

Chinese classification (CCS): H04.

Estimated length of the Chinese original: 6,672 words.
