What this standard covers

This standard specifies the overall design requirements, system requirements, main equipment and material selection, environmental protection control measures, operation and maintenance, etc. for semi-dry desulfurization of sintering flue gas circulating fluidized bed. This document applies to the semi-dry desulfurization process of circulating fluidized bed flue gas in sintering machine head flue gas in steel enterprises, and the semi-dry desulfurization process of circulating fluidized bed flue gas in pellet roasting can be used as a reference.

Document data

International classification (ICS): 77-010.

Chinese classification (CCS): H00.

Estimated length of the Chinese original: 9,947 words.
