What this standard covers

This standard specifies the general principles, technical requirements, methods, procedures and reports for the evaluation of the operation effect of flue gas desulfurization and denitrification equipment in the iron and steel industry. This document is applicable to the evaluation of the operation effect of wet, semi-dry/dry desulfurization equipment of coke oven flue gas in the iron and steel industry, as well as flue gas SCR denitrification and activated carbon/coke desulfurization and denitrification integrated processes. Other similar desulfurization and denitrification processes can be used as a reference.

Document data

International classification (ICS): 77.010.

Chinese classification (CCS): H00.

Estimated length of the Chinese original: 12,115 words.
