What this standard covers

This standard specifies the basic requirements for the critical micro-pulse electrostatic precipitator process for sintering/pelletizing flue gas, the design requirements for the dust removal system, and the operation and maintenance. This document is applicable to the electrostatic pre-dust removal process for flue gas from sintering machine heads and pellet roasting in the steel industry.

Document data

International classification (ICS): 77.010.

Chinese classification (CCS): H00.

Estimated length of the Chinese original: 8,857 words.
