What this standard covers

This standard specifies the structure and basic parameters, technical requirements, test methods, inspection rules, markings, packaging, transportation, and storage of high-voltage electrostatic separators for metallurgical mining. This standard applies to high-voltage electrostatic separators for metallurgical mining that separate materials with a particle size $\leq 4\text{mm}$. It can also be used for high-voltage electrostatic separators for materials such as plastics, aluminum products, and electronic waste in chemical and environmental protection industries under similar working conditions.

Document data

International classification (ICS): 77.180.

Chinese classification (CCS): H99.

Estimated length of the Chinese original: 12,132 words.
