What this standard covers

This standard specifies the general requirements for U-shaped steel pipe classification, ordering contents, manufacturing process, technical requirements, test methods, packaging, marking, and quality certificates. This standard applies to the general technical requirements for seamless or welded U-shaped steel pipes used in heat exchange equipment in industries such as petrochemical, chemical, thermal power, nuclear power, solar energy, food, and pharmaceutical. Alloy (such as corrosion-resistant alloy) U-shaped pipes can be used with reference to this standard.

Document data

International classification (ICS): 77.140.75.

Chinese classification (CCS): H48.

Estimated length of the Chinese original: 15,171 words.
