What this standard covers

This standard specifies the energy consumption level, technical requirements, statistical range, calculation method, energy-saving management and measures for unit product energy consumption in rotary hearth furnace processes. This standard applies to the calculation and evaluation of unit product energy consumption in rotary hearth furnace production lines handling ferrous materials in the iron and steel industry. Other industries may refer to this standard.

Document data

International classification (ICS): 77-010.

Chinese classification (CCS): H04.

Estimated length of the Chinese original: 11,150 words.
