What this standard covers

This standard specifies the terminology and definitions, principles, instruments and materials, specimens, test procedures, result expression, and test reports for the test method of thermal shock resistance of blast furnace carbon blocks. This standard is applicable to the determination of the thermal shock resistance of blast furnace carbon blocks.

Document data

International classification (ICS): 81.080.

Chinese classification (CCS): Q52.

Estimated length of the Chinese original: 7,720 words.
