What this standard covers

This standard specifies the safety technology and site requirements for the safety production standardization of tobacco companies, including equipment facilities, operating activities, operating environment and safety requirements for on-site operation. This standard applies to provincial-level tobacco companies (bureaus), provincial industrial companies and other provincial companies, tobacco processing and tobacco commercial production and operation units. Among them, the tobacco commercial production and operation unit refers specifically to the municipal tobacco company, and the tobacco processing unit includes the unit of tobacco leaf re-baking, cigarette manufacturing, cigar manufacturing, and reconstituted tobacco production. Other production and business units of tobacco supporting and diversified investment, such as acetate fiber, tobacco printing and other units can refer to implementation.

Document data

International classification (ICS): 65.160.

Chinese classification (CCS): X85.

Estimated length of the Chinese original: 125,117 words.

Supersedes the earlier edition YC/T 384.2-2011.
