Foreword

This standard was drafted in accordance with the rules given in GB/T 1.1-2009.

This standard is proposed by the State Tobacco Monopoly Bureau.

This standard is under the jurisdiction of the National Technical Committee on Tobacco Standardization Technical Committee (SAC/TC144/SC4).

Introduction

In order to implement the "Environmental Protection Law of the People's Republic of China" and the "Promotion Law of the People's Republic of China on Cleaner Production," improve the utilization of and to avoid the generation of pollutants, to protect and improve the environment, and to guide the remanufactured tobacco leaf production enterprises to carry out cleaner production evaluation work, this standard has been formulated.

Remanufacturing Tobacco Manufacturers Clean Production Evaluation Criteria

1 Scope

This standard specifies the general requirements, evaluation index system, data collection and evaluation methods for remanufactured tobacco leaf production enterprises.

This standard applies to remanufactured tobacco leaf production enterprises.

2 Normative references

The following documents are indispensable for the application of this document. For dated references, only dated versions apply to this article Pieces. For undated references, the latest version (including all amendments) applies to this document.

GB 12348-2008 Environmental noise emission standards for boundary of industrial enterprises
GB 17167 General Requirements for Equipping and Management of Energy Measuring Instruments
GB 18597 Pollution Control Standard for Storage of Hazardous Wastes
GB 18599 General Industrial Solid Waste Storage and Disposal Site Pollution Control Standards
GB/T.20106-2006 Industrial Cleaner Production Evaluation Index System General Rules
GB/T 23331 Energy Management System Requirements
GB/T 24001 Environmental Management System Requirements and Usage Guidelines
YC/T 137 shredded tobacco packaging
YC/T 199 Guidelines for Cleaner Production Evaluation of Cigarette Enterprises
YC/T 491 re-baked product lined with polyethylene film bag

3 Terms and Definitions

The following terms and definitions as defined in GB/T.20106 and YC/T 199 apply to this document. For ease of use, the following is repeated.

Some terms and definitions in GB/T.20106 and YC/T 199 are published.

Clean energy cleanerenergy Natural gas, oil (excluding heavy oil), electricity, urban central heating steam, and state-identified clean energy.

[YC/T 199, Definition 3.1] 3.2 Cleaner production Continuously adopt measures to improve design, use of clean energy and raw materials, use advanced technology and equipment,

improve management, and make comprehensive use of Application, reduce pollution from the source, increase the efficiency of resource use, and reduce or avoid the generation and disposal of pollutants during production, service, and product use.

Release to reduce or eliminate harm to human health and the environment.

Note: Quoted from "Cleaner Production Promotion Law of the People's Republic of China".

[YC/T 199, Definition 3.1] 3.3 Cleaner Production Evaluation Indicator System
assessmentindicatorsystemofcleanerproduction the indicator consisting of a series of cleaner production evaluation indicators that are interrelated, relatively independent, and complementary to each other and are used to measure the state of cleaner production.
