**Safety management requirements for tobacco industry
laboratory
(English Translation)**

Issued on: January 1, 1970

Implemented on: January 1, 1970

Issued by: State Tobacco Monopoly Administration

Table of Contents

Preface
Introduction
1 Scope
2 Normative references
3 Terms and Definitions
4 General requirements for laboratory safety management
4.1 General Requirements
4.2 Organization and Responsibilities
4.3 Laws, Regulations and Institutions
4.4 Document Control
4.5 Security Awareness, Competence and Training Education
4.6 Procurement
4.7 Laboratory Housekeeping
5 Laboratory safety technical management requirements
5.1 Hazard identification and risk assessment
5.2 Facilities and environment
5.2.1 Laboratory structure and layout
5.2.2 Fire fighting facilities
5.2.3 Electrical equipment and power supply lines
5.2.4 Ventilation
5.2.5 Air conditioning and heating
5.2.6 Lightning protection
5.2.7 Security
5.3 Materials
5.3.1 Hazardous chemicals
5.3.2 Gas cylinders
5.3.3 Laboratory equipment
5.4 Scientific research and testing methods
5.5 Safety signs
5.6 Work management in isolation
6 Occupational health and safety management
6.1 Occupational health and labor protection management

- 6.2 Personal protective equipment
- 7 Emergency Management
 - 7.1 Emergency plan
 - 7.2 Emergency supplies and equipment
 - 7.3 Emergency plan management and drills
 - 7.4 Incident Management
- 8 Collection, identification and disposal of laboratory waste
- Reference

Foreword

This document is in accordance with the provisions of GB/T 1.1-2020 "Guidelines for Standardization Work Part 1: Structure and Drafting Rules of Standardization Documents" drafted.

Introduction

This document is guided by the "Safety Production Law", "Fire Protection Law", "Occupational Disease Prevention and Control Law" and "Regulations on the Safety Management of Hazardous Chemicals".

It is prepared according to the actual requirements of laboratory safety management in the tobacco industry.

The purpose of this document is to implement the "safety first, prevention first, comprehensive management" work safety management policy, provide tobacco the standardized, scientific, and standardized management basis for industry laboratory safety management is to ensure the effective operation of the laboratory safety management system in the tobacco industry.

Therefore, the risk of the tobacco industry laboratory is under control, and the overall laboratory safety production of the tobacco industry is continuously improved.

management level.

Laboratory Safety Management Requirements for Tobacco Industry

1 Scope

This document specifies the relevant requirements for laboratory safety management in the tobacco industry.

This document applies to tobacco industry laboratories.

2 Normative references

The contents of the following documents constitute essential provisions of this document through normative references in the text. Among them, dated citations documents, only the version corresponding to that date applies to this document; for undated references, the latest edition (including all amendments) applies to this document.
