Table of Contents

Preface
Introduction
1 Scope
2 Normative references
3 Terms and definitions
4 General
4.1 Enterprise dual prevention mechanism
4.2 Basic requirements of dual prevention mechanism
5 Safeguard measures for the construction of a dual prevention mechanism
5.1 Organizational Guarantee
5.1.1 Organization
5.1.2 Division of Responsibilities
5.2 System guarantee
5.2.1 Special system
5.2.2 Other systems
5.3 Safety investment and other guarantees
5.3.1 Funds
5.3.2 People
5.3.3 Informatization
6 Security risk hierarchical management and control
6.1 Division of risk units
6.1.1 Work Process
6.1.2 Implementation requirements and methods
6.2 Risk identification
6.2.1 Work Flow
6.2.2 Implementation requirements and methods
6.3 Risk assessment
6.3.1 Work Flow
6.3.2 Implementation requirements and methods
6.4 Risk control
6.4.1 Work Flow
6.4.2 Implementation requirements and methods

- 6.4.2.1 Risk notification and early warning
- 6.4.2.2 Determination of risk control measures
- 6.4.2.3 Risk hierarchical management and control
- 6.5 Record and file
 - 6.5.1 Risk hierarchical control list and risk notification card
 - 6.5.2 Risk management and control plan and files
 - 6.5.3 Risk Distribution Chart
- 7 Investigation and management of hidden dangers
 - 7.1 Hazard identification, classification and classification criteria
 - 7.1.1 Determination of hidden dangers
 - 7.1.2 Hidden danger classification
 - 7.1.3 Classification of hidden dangers
 - 7.2 Identify the key parts and list of hidden dangers
 - 7.2.1 Work Flow
 - 7.2.2 Implementation requirements and methods
 - 7.2.2.1 Key parts of hidden danger investigation
 - 7.2.2.2 Checklist of hidden dangers
 - 7.3 Hidden danger investigation
 - 7.3.1 Work Flow
 - 7.3.2 Implementation requirements and methods
 - 7.3.2.1 Implementation of hidden danger investigation
 - 7.3.2.2 Hidden danger investigation and notification
 - 7.4 Hazard management and acceptance
 - 7.4.1 Work Flow
 - 7.4.2 Implementation requirements and methods
 - 7.4.2.1 Treatment of hidden dangers
 - 7.4.2.2 Governance effectiveness acceptance
 - 7.4.2.3 Hidden danger management notification
 - 7.5 Hierarchical management of hidden dangers
 - 7.5.1 Hidden danger classification investigation
 - 7.5.2 Hidden hazards classified management and acceptance
 - 7.6 Recording and archiving
 - 7.6.1 Hidden Danger Ledgers and Files
 - 7.6.2 Statistical analysis

- Appendix A (informative appendix) Schematic diagram of the working relationship between security risk hierarchical management and control, and accident investigation and management
- Appendix B (informative appendix) Schematic diagram of work process related to security risk classification management and control
- Appendix C (informative appendix) Schematic diagram of the work process related to hidden danger investigation and management
- Appendix D (informative appendix) Example of the severity analysis of common energy levels in tobacco companies
- Appendix E (informative appendix) Example 28 of the use of risk assessment matrix method (LS method) by tobacco companies
- Appendix F (Informative Appendix) Example 31 of Tobacco Enterprise Using Operating Condition Analysis Method (LEC Method)
- Appendix G (informative appendix) Guidelines for determining hidden dangers of major accidents by tobacco companies
- Appendix H (informative appendix) Tobacco company A-level general hidden danger determination criteria
- Appendix I (informative appendix) Classification standards for the statistical reporting of hidden dangers of tobacco companies
- Appendix J (informative appendix) Examples of work related to the hierarchical management and control of safety risks in tobacco companies and the investigation and management of hidden accidents

Introduction

Adhere to the policy of "safety first, prevention first, and comprehensive management", and establish a dual prevention system for hierarchical management and control of safety risks and investigation and management of potential accidents Preventive mechanism, put safety risk management and control ahead of hidden dangers, put hidden dangers investigation and management before accidents, and build the last prevention of accident emergency rescue it is a major decision of the Party Central Committee and the State Council to curb serious and serious safety accidents. The purpose of this guiding technical document is to provide Provide guidance for the establishment, implementation, maintenance and improvement of the dual prevention mechanism.

The dual prevention mechanism of hierarchical management and control of safety risks and the investigation and management of hidden dangers of accidents should be integrated into the standardization of enterprise safety production and become safe the core link of production standardization. To this end, this guiding technical document is in line with YC/T 384.1 "Standardized Specification for Safe Production of Tobacco Enterprises" Part 1: The Basic Management Standards maintain consistent requirements on the hierarchical management and control of safety risks and the the implementation requirements and methods of the work have been refined and deepened.

The hierarchical management and control of safety risks and the investigation and management of hidden accidents are inseparable; if risks are not fully identified and controlled, they will If the hidden dangers of accidents occur, and the hidden dangers of accidents cannot be effectively managed, accidents and injuries will occur. To this end, this guiding technical document Work as a system, puts forward specific implementation procedures, requirements and methods for each work of the dual prevention mechanism, and provides relevant examples.

Due to the differences in the production process, production and operation sites, equipment and facilities, and operational activities of various tobacco companies, there may be Safety risks and hidden accidents, and their corresponding management responsibilities, processes, and methods are not the same. Each company should establish, implement, and protect Maintain and improve the unit's dual prevention mechanism to ensure the systematic, standardized, and effective safety risk hierarchical management and control and hidden accident investigation and management.

Tobacco enterprise safety risk hierarchical control and accidents Hazard investigation and management guide
