What this standard covers

This standard specifies the requirements for the establishment, implementation, maintenance and improvement of a dual prevention mechanism (hereinafter referred to as the "dual prevention mechanism") for laboratory safety risk classification control and accident hazard investigation and management in tobacco enterprises. This standard applies to tobacco enterprise physics and chemistry laboratories (hereinafter referred to as "laboratories"), and biological laboratories can refer to it for implementation.

Document data

International classification (ICS): 65.160.

Chinese classification (CCS): X87.
