What this standard covers

This standard is applicable to the anti-seismic performance test of SDH equipment, WDM equipment, MSTP equipment, PTN equipment, OTN equipment and ASON equipment, which are in the seismic intensity of 7 to 9 intensity. For other optical transmission equipment can refer to this standard. This standard specifies the testing items, index requirements, test methods and evaluation criteria for SDH equipment, WDM equipment, MSTP equipment, PTN equipment, OTN equipment, ASON equipment for seismic performance testing.

Document data

Chinese classification (CCS): M04.

Estimated length of the Chinese original: 70,725 words.

Supersedes the earlier edition YD 5091-2005.
