What this standard covers

This standard specifies the third-generation digital cellular mobile communications engineering construction supervision behavior in order to achieve the project quality control, schedule control, cost control, contract management, information management, safety supervision and management and organization and coordination (three control three a coordination). This standard applies to new third-generation digital cellular mobile communications engineering (TD-SCDMA, WCDMA, CDMA2000) construction supervision. For the renovation and expansion of the third generation digital cellular mobile communications engineering construction supervision may refer to these provisions.

Document data

International classification (ICS): 33.020.

Chinese classification (CCS): P76.

Estimated length of the Chinese original: 25,250 words.
