What this standard covers

This standard specifies the 900/1800 MHz TDMA digital cellular mobile communication network repeater equipment, 800 MHz CDMA digital cellular mobile communication network repeater equipment, 800MHz/2GHz cdma2000 digital cellular mobile communication network repeater equipment, 2GHz WCDMA digital cellular mobile communication network repeater equipment, 2GHz TD-SCDMA digital cellular mobile communication network repeater equipment anti- seismic performance testing of environmental testing, test items, technical performance, testing and assessment methods. This standard applies to this standard into the seismic intensity of 7 to 9 degrees territories digital cellular mobile communication network repeater above standard equipment and all kinds of indoor and outdoor distribution system amplifier and relay device similar seismic performance testing. For the same system can also be other types of amplifiers refer to this standard.

Document data

International classification (ICS): 33.020.

Chinese classification (CCS): P76.

Estimated length of the Chinese original: 30,338 words.
