What this standard covers

This standard specifies the types and requirements of non-metallic reinforced-fiber-reinforced plastic flexible rods for optical cables, and describes the corresponding test methods. This standard applies to the design, development, production and inspection of FFRP for circular non-metallic strength members for optical cables, and other shapes of FFRP can also be used as a reference.

Document data

Chinese classification (CCS): M33.

Estimated length of the Chinese original: 10,145 words.
