### What this standard covers

This standard specifies the service definition of network-based virtual IP private network (IP-VPN), and defines the service system of the Border Gateway Protocol (BGP) piggyback mode and the service system of the Virtual Private Dial-up Network (VPDN) access mode, including the networking and equipment requirements, service definition, implementation requirements, and service system of VPN services. This standard applies to the production, sales and use of various IP-VPN equipment in China and the provision of IP-VPN services.

### Document data

International classification (ICS): 33.040.40.

Chinese classification (CCS): L79.

Supersedes the earlier edition YD/T 1190-2002.
