1 Foreword

YD/T 1243.3-2002 was issued by Ministry of Industry and Information Technology on 10 December 2002 and took effect the same day.

It is one of 4 parts of the YD/T 1243 series.

The YD/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

2 Scope Preview

This standard provides integrated access media gateway device functionality, interface, control protocol, signaling, network management, performance indicators, timing and synchronization, software and hardware, power supply, and environmental and other requirements. Integrated access media gateway should support at least access to one IP network or ATM network. This standard applies to integrated access media gateway equipment development, production and technology transfer.
