1 Foreword

YD/T 1322.1-2004 was issued by Ministry of Industry and Information Technology on 4 August 2004.

It is one of 4 parts of the YD/T 1322 series.

The YD/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

2 Scope Preview

This standard specifies the IP network based on Extensible Markup Language (XML) business-to-consumer (B2C) e-commerce overall framework structure, including the overall structure of the transaction flow of communication, the communication protocol stack, application layer protocol structure, application layer protocols, security and technical requirements, etc. Certification Center. This standard specifies the e-commerce transactions can use various electronic payment protocol, but does not prescribe specific payment agreement. This part does not require the parties involved in electronic commerce software and the need to perform specific processing, the transaction only provides the necessary framework. For tax and legal status of e-commerce and other aspects of the content is not within the scope of this section. This standard applies to business-to-consumer (B2C) e-commerce platform category.

YD/T 1322.1-2004 falls under ICS 35.240.60, in the field of information technology.
