1 Foreword

YD/T 1322.2-2004 was issued by Ministry of Industry and Information Technology on 4 August 2004.

It is one of 4 parts of the YD/T 1322 series.

The YD/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

2 Scope Preview

This standard specifies the Internet Open Trading Protocol (IOTP) application cores with a common interface between the payment module, the purpose is to ensure interoperability between these modules, and provides for the application in the actual implementation of the kernel I0TP a "Plug i. e. with "mechanisms, but also based on the definition of IOTP payment application programming interface (API), the message processes. This section applies to an interface exists in consumers, merchants and payment processing between the three parties, the IOTP Application Core and payment software component/policy system connected.

YD/T 1322.2-2004 falls under ICS 35.240.60, in the field of information technology.

This catalogue holds 725 other YD/T standards in that field.

In this catalogue, YD/T standards carry edition years from 1982 to 2026.
