What this standard covers

This standard specifies the 2GHz TD-SCDMA digital cellular mobile communication network air interface layer 2 protocol functions RLC, RLC service provided to the upper and expectations of business as well as obtained from the lower layers of communication between the primitives, established on layer communication elements such as structure and parameters of the specific requirements of the RLC protocol gives the basic process and the unknown, unforeseen and error event handling method. This standard applies to 2GHz TD-SCDMA digital cellular mobile communication network air interface RLC protocol.

Document data

International classification (ICS): 33.070.

Chinese classification (CCS): M37.

Estimated length of the Chinese original: 65,650 words.

Adopted international standard: 3GPP R4 TS 25.322-RLC protocol, MOD (version: V4.8.0).
