What this standard covers

This standard specifies the No. 7 signaling messaging part of the second level user adaptation layer (M2UA) protocol functions, message parameters, formats and procedures. This standard is applied as the signaling transport protocol M2UA adaptation protocol softswitch equipment, as well as the signaling gateway function (SGF) and media gateway function (MGF) using the same physical entity signaling gateway device, this time signaling gateway function only completed the signaling link terminal functions.

Document data

International classification (ICS): 33.040.

Chinese classification (CCS): M19.

Estimated length of the Chinese original: 56,511 words.
