What this standard covers

This standard specifies the requirements for application scenarios, interfaces, functions, security, management and maintenance, performance, and environmental power supply for broadband customer gateways that support the DS-Lite protocol. This standard is applicable to home broadband subscriber gateways and enterprise broadband subscriber gateways supporting the Light-weight Dual-Stack (DS-Lite) protocol.

Document data

International classification (ICS): 33.040.55.

Chinese classification (CCS): M19.

Estimated length of the Chinese original: 12,149 words.
