What this standard covers

This standard specifies the networking mode, architecture requirements, policy control functions and architecture performance requirements of PON and mobile cellular dual-uplink customer gateway equipment. This standard applies to gateway equipment that uses wired and wireless converged access technology in broadband customer networks based on public telecommunication networks.

Document data

International classification (ICS): 33.040.40.

Chinese classification (CCS): M33.

Estimated length of the Chinese original: 22,253 words.
