What this standard covers

This standard specifies the CAMEL3 stage 900/1800MHz TDMA digital cellular mobile communication network service switching point (SSP) device in the circuit switched domain of the basic trigger functions, other key functions, CAMEL relationship between business and supplementary services processing, SRF function, signaling with, performance indicators and processing capabilities, billing functions, operation and maintenance functions, statistical functions such as testing methods. This section does not involve packet domain related functionality testing methods. This standard applies to 900/1800MHz TDMA digital cellular mobile communication network CAMEL3 stages of the service switching point (SSP) devices.
