What this standard covers

This standard specifies the terms and definitions, product classification, structure and materials, performance requirements, test methods, quality assurance, packaging and marking of gas-blown micro-cables and fiber-optic unit series products for communication. This standard is applicable to a variety of communication air-blown micro-cables and fiber-optic units used in outdoor or indoor pipeline environments. It can also be used as a design reference for air-blown installation and wiring.

Document data

Chinese classification (CCS): M33.

Estimated length of the Chinese original: 39,332 words.

Supersedes the earlier edition YD/T 1460.1-2006.
