What this standard covers

This standard specifies the ISDN Q. 921 User Adaptation Layer Protocol (IUA) services provided, functions, boundary definition, using protocol unit, processes and procedures and other technical requirements, but also provides the ISDN Q. 921 User messages sent using the flow control protocol (SCTP) in the IP network transport protocol mechanisms. This standard applies to a standard ISDN interface and signaling media gateway, signaling gateway and softswitch equipment.
