What this standard covers

This standard specifies the V5. 2 User Adaptation Layer Protocol V5UA in SSMGC (softswitch/media gateway controller) and SG (signaling gateway) between the entity's functional assignment, client/server mode, V5. 2 return mechanism, error handling, procedures and other technical requirements. This standard applies to SG and integrated access media gateway SS/MGC interface between the protocol. V5UA to IUA based and defines some of the A suitable extension of the V5. 2 interface. Since Y5UA IUA protocol is an extension, so if no special explanation, IUA defined are applicable to V5UA.

Document data

International classification (ICS): 33.080.

Chinese classification (CCS): M13.

Estimated length of the Chinese original: 19,141 words.

Adopted international standard: IETF RFC 3807, MOD.
