What this standard covers

This standard specifies the spectral spreading of the second generation asymmetric digital subscriber line transceivers ADSL2 + line reference model, TPS-TC layer, PMS-TC layer, PMD layer characteristics, OAM functions, dynamic behavior, transfer performance and electrical characteristics requirements. This standard applies to ADSL2 + technology with or contain the DSL line transceiver.

Document data

International classification (ICS): 33.040.50.

Chinese classification (CCS): M19.

Estimated length of the Chinese original: 91,962 words.
