What this standard covers

This standard specifies the radio resource control protocol between the user equipment (UE) and the radio access system (UTRAN) in the third generation mobile communication system, that is, the Uu interface. It also includes the transparent transmission of the route between the source RNC and the destination RNC. This standard is applicable to the wireless interface of 2GHz WCDMA digital cellular mobile communication network.

Document data

International classification (ICS): 33.040.01.

Chinese classification (CCS): M15.

Estimated length of the Chinese original: 1,315 words.

Adopted international standard: 3GPP R99 TS25.31 V3.d.0, IDT.
