What this standard covers

This standard specifies the product classification, requirements, test methods, inspection rules, packaging, transportation, and storage of 50?? foam polyolefin insulated smooth (rolled-textured) copper (aluminum) tube outer conductor radio frequency coaxial cables for wireless communication. This standard applies to the manufacture, testing, and use of 50?? polyolefin foam-insulated, smooth (rolled-textured), copper (aluminum) tubular outer conductor radio frequency coaxial cables for wireless communication, with an operating frequency range of 100 MHz to 7125 MHz.

Document data

International classification (ICS): 33.120.10.

Chinese classification (CCS): K13.

Supersedes the earlier edition YD/T 1667-2007.
