What this standard covers

This standard specifies the 800MHz/2GHz cdma2000 digital cellular mobile communication network broadcast multicast service core network equipment broadcast multi-wave controller, the radio service node, authentication, authorization, and accounting (AAA) and broadcast multicast service content server functionality requirements, interface requirements, billing, network management, and performance requirements. This standard applies to 800MHz/2GHzcdma2000 wide digital cellular mobile communication network plug multicast traffic.

Document data

International classification (ICS): 33.060.99.

Chinese classification (CCS): M36.

Estimated length of the Chinese original: 78,748 words.

Adopted international standard: 3GPP2 X.S0022-0 V1.0, MOD.

Supersedes the earlier edition YD/T 1675-2007; YDC 072-2008.
