What this standard covers

This standard specifies the telecommunications equipment within the near field near the surface electric, magnetic or electromagnetic component of the assessment methods. This standard applies to the operating frequency range of 150kHz ~ 1GHz telecommunications equipment inside the IC.

Document data

International classification (ICS): 33.100.10.

Chinese classification (CCS): L06.

Estimated length of the Chinese original: 22,267 words.

Adopted international standard: IEC 61967-3-2005, MOD.
