What this standard covers

This standard specifies the standardization of telecommunications equipment for internal use beta or printed circuit (PCB) on the IC electromagnetic conduction disturbance (EME) Workbench Faraday cage test method. In this section squadron also made ??a unified test method requirements and detailed guidance. This standard applies to the operating frequency range of 150kHz ~ 1GHz telecommunications equipment inside the IC.

Document data

International classification (ICS): 33.100.10.

Chinese classification (CCS): L06.

Estimated length of the Chinese original: 18,122 words.

Adopted international standard: IEC 61967-5, MOD.
