What this standard covers

This standard specifies the Universal Integrated Circuit Card (UICC) and the USIM application characteristics of the interface between the terminal and technical requirements, including the USIM application-related file structure, contents, terminal, USIM application should be supported protocols and security features as well as USIM command. This section applies to TD-SCDMA terminal, WCDMA terminal, TD-SCDMA/WCDMA dual-mode terminal, TD-SCDMA/GSM dual-mode terminal, WCDMA/GSM dual-mode terminal with USIM application and ID-1 type, Plug-in type and mini -UICC Universal Integrated Circuit Card, and interfaces between the USIM and the terminal.

Document data

International classification (ICS): 33.060.

Chinese classification (CCS): M36.

Estimated length of the Chinese original: 160,111 words.

Supersedes the earlier edition YD/T 1762.2-2008.
