What this standard covers

This standard specifies the embedded multi-service transport MPLS node (MSTP) functionality, performance and network management testing methods, including the nodes in the data plane, control plane functions, MPLS layer performance, L2VPN MPLS layer network management applications and other technologies shall meet the test requirements and adopt the guidelines. This standard applies to MPLS SDH equipment to provide inline functions, to achieve L2VPN Ethernet services, while providing a unified multi- service transport network node (MSTP) tests.

Document data

International classification (ICS): 33.040.20.

Chinese classification (CCS): M33.

Estimated length of the Chinese original: 50,535 words.
