What this standard covers

This standard specifies the digital trunking communication system based on CDMA mobile station and a base station transmitter frequency requirements, the physical channel modulation characteristics required physical channel modulation characteristics requirements, and MAC layer interface requirements, the transmitter and receiver performance requirements for air The physical layer interface standard technical requirements. This standard applies to CDMA-based digital trunking communication system.

Document data

International classification (ICS): 33.060.50.

Chinese classification (CCS): M37.

Estimated length of the Chinese original: 203,247 words.
