### What this standard covers

This standard specifies the 2GHz TD-SCDMA digital cellular mobile communication network radio access network equipment Ir interface testing methods, including Ir interface function tests, Ir interface performance testing, start- process testing and application layer testing C & M process. This standard applies to 2GHz TD-SCDMA digital cellular mobile communication network of distributed base stations Ir interface section.

### Document data

International classification (ICS): 33.060.20.

Chinese classification (CCS): M36.

Estimated length of the Chinese original: 34,348 words.
