What this standard covers

This standard specifies the 2GHz TD-SCDMA/WCDMA Digital Cellular Mobile Telecommunication Network authentication architecture model, protocol architecture, common authentication framework for authentication and key negotiation process, the use of generic authentication framework, roaming applications and business expansion push application. This standard applies to network users to access multiple applications TD-SCDMA/WCDMA business.

Document data

International classification (ICS): 33.040.

Chinese classification (CCS): M10.

Estimated length of the Chinese original: 95,946 words.
