What this standard covers

This standard specifies the 800MHz/2GHz cdma2000 digital cellular mobile communication network of traditional terminal domain (LMSD) mobile switching center and the interface between the base station subsystem test methods, including voice business process, supplementary services and short message, the packet data service processing, wireless resources management, mobility management and authentication and management of terrestrial circuits and test environment. This standard applies to 800MHz/2GHz cdma2000 digital cellular mobile communication network of traditional terminal domain (LMSD) system equipment.

Document data

International classification (ICS): 33.060.99.

Chinese classification (CCS): M36.

Estimated length of the Chinese original: 109,175 words.
