What this standard covers

This standard specifies the 800MHz/2GHz cdma2000 digital cellular mobile communication network, high-speed packet data (HRPD) (second stage) air interface test methods. This standard applies to 800MHz/2GHz cdma2000 digital cellular mobile communication network, high-speed packet data (HRPD) Phase -art digital cellular mobile communication systems AT and access networks. This is also applicable to high-speed packet -based data (HRPD) developed under Phase AT. This standard applies to support UIM card (UIM) and does not support the UIM card (machine card) of 800MHz/2GHz cdma2000 High Rate Packet Data (HRPD) of AT. For only supports cdma2000 HRPD business functions singlemode AT, mixed-mode and dual-mode functionality businesses need cdma2000 test items do not apply. For while supporting business functions and cdma2000 HRPD business functions dual access terminal, mixed-mode and dual-mode functionality businesses need cdma2000 test items apply.

Document data

International classification (ICS): 33.060.99.

Chinese classification (CCS): M36.

Estimated length of the Chinese original: 31,345 words.
