What this standard covers

This standard specifies the EAP-based DHCP + IP network access authentication architecture, networking, communication processes, communication protocol and the related equipment requirements. This standard applies to the link layer using IEEE 802 LAN technology, xDSL technology and HFC public IP access network technology, but also for DHCP + EAP-based authentication, authorization software and equipment. This standard does not apply to IPv6 network environment.

Document data

International classification (ICS): 33.040.40.

Chinese classification (CCS): M32.

Estimated length of the Chinese original: 33,377 words.
