What this standard covers

This standard specifies requirements for IPv6 routing capabilities with Ethernet switch device functional testing, performance testing, protocol testing and conventional testing methods. IPv6 routing capabilities with Ethernet switches are based on the IPv6 protocol stack, with the ability to learn and the third layer routing exchange capacity Ethernet switch. This standard applies to support the IPv6 protocol, Ethernet switch with routing capabilities.

Document data

International classification (ICS): 33.040.40.

Chinese classification (CCS): M32.

Estimated length of the Chinese original: 45,414 words.
