What this standard covers

This standard specifies the synchronous digital hierarchy based (SDH) transmission multi-service node (MSTP) equipment interoperability testing methods, including: SDH optical interface interoperability testing, Generic Framing Procedure (GFP) interoperability testing, virtual concatenation and link Road Capacity Adjustment Scheme (LCAS) interoperability testing, Multi-Protocol Label Switching (MPLS) and Ethernet interoperability testing service interworking testing. This standard applies to different manufacturers SDH-based MSTP interoperability testing between the devices.

Document data

International classification (ICS): 33.040.20.

Chinese classification (CCS): M19.

Estimated length of the Chinese original: 25,256 words.
