What this standard covers

This standard provides for fiber optic systems or subsystems following semiconductor optoelectronic devices Essential ratings and characteristics: a semiconductor light emitting device, semiconductor optical detector element, monolithic or hybrid integration of optoelectronic devices and other components. This standard applies to the semiconductor light-emitting device, the semiconductor light detector parts and monolithic or hybrid integration of semiconductor optoelectronic devices and other components.

Document data

International classification (ICS): 33.180.01.

Chinese classification (CCS): M33.

Estimated length of the Chinese original: 30,356 words.

Adopted international standard: IEC 62007-1-2008, MOD.
