Foreword

YD/T 2019.7-2026 is a recommended industry standard of the People's Republic of China in the Telecom sector, approved and issued by the Ministry of Industry and Information Technology on 1 June 2026, with effect from 1 September 2026.

It is administered by the China Communications Standards Association.

Classification: ICS 33.040.50; CCS M42.

1 Scope

Part 7 of the YD/T 2019 series describes test methods for fiber-to-the-room (FTTR) business equipment, that is, the enterprise-use devices of a fiber-to-the-room network. The tests cover hardware interfaces, equipment functions, performance and other items.

The document applies to the research and development, production and testing of FTTR business equipment in broadband customer networks based on the public telecommunication network, and private telecommunication networks may also refer to it. It is used by equipment manufacturers, test laboratories and telecom operators that check devices before purchase or deployment. It is a voluntary standard, as shown by the /T in its code. It was approved and issued by the Ministry of Industry and Information Technology on 1 June 2026 and takes effect on 1 September 2026. It is a new standard.
